New and expanded recreational facilities to benefit five Manitoba communities

Joint federal, provincial, First Nation, and municipal funding through the Investing in Canada Infrastructure Program (ICIP) will support five projects in Manitoba. These projects will build and upgrade recreational and sports infrastructure to help residents of these communities stay active and healthy.

The Government of Canada is investing more than \$9.8 million in these projects through ICIP's Community, Culture and Recreation Infrastructure Stream and Rural and Northern Communities Infrastructure Stream. The Manitoba government is providing more than \$3.1 million.

Contributions from project proponents total more than \$4.6 million toward eligible project costs.
