

**LIST OF INNOVATION GROWTH PROGRAM
RECIPIENTS**

- 3Common Inc.: \$30,000 for market testing of their integrated booking, ticketing and marketing online platform designed for event organizers, tour operators and small- to medium-sized businesses that offer recurring events and experiences.
- CogNet Inc.: \$70,000 towards the commercialization of clinically validated software for home-based cognitive testing supports such as preliminary dementia screening and monitoring for progression.
- Cubresa Inc.: \$62,500 towards the commercialization of the Cubresa BrainPET, a removable insert that retrofits to existing MRI scanners, allowing simultaneous, non-invasive PET/MRI brain imaging scans for evaluation of neurological diseases including epilepsy, brain cancers and Alzheimer’s disease.
- ErosionControlBlanket.com, operating as ECBVerdyol: \$37,500 towards the market testing of a novel oat-hull based soil stabilization product.
- Evolution Wheel: \$100,000 towards prototyping and testing of a new serviceable and repairable type of solid, airless wheel loader tire for use with large heavy equipment primarily in the waste and recycling and metal scrap industries.
- NextGen Environmental Research Inc.: \$40,000 towards market testing of an artificial intelligence-based cell phone camera system for fish species identification and measurement verification for angling competitions and tournaments.
- PolySense Solutions Inc.: \$67,500 to pursue quality assurance certification for two patent-pending wireless sensor devices for industrial equipment called NODE and NODE+. The sensors are designed to monitor a variety of high-asset industrial systems in a range of sectors such as aerospace, food services and grocery.
- Refuah Solutions Ltd.: \$40,000 towards marketing of the “PI-Enroll” software platform that helps accelerate the completion of medical clinical trials by facilitating the matching of clinical trial candidates with active trials in progress.
- Spark E Apparel Ltd., operating as Spark E Safety: \$40,000 towards the commercialization of specialized, biomechanically designed, arc-rated and flame-resistant safety garments for high- and low-voltage work environments in the energy, oil and gas, mining, electrical, construction, solar and wind industries. The product’s design focuses on addressing the unique needs of women and individuals with diverse body types within this market.
- Take Place: \$97,750 towards the construction of a full-scale market pilot of an on-site custom modular residential home.

- tauMEDIS Inc.: \$25,000 towards the commercialization and marketing of a compact, floor-based MRI medical scanner for intra-operative use.
- Twenty Point Nine Inc., operating as The Den: \$100,000 towards the marketing and promotion of a new form of video streaming service capable of providing in-video purchasing opportunities.
